

About the District

Since the District first began serving customers in 1987 and 1988, it has been organized with four service areas based on geography in two watersheds. From east to west these areas are: the Primary Area which includes the original EPA project in the Home Place area; the Meridian Corridor business corridor along US Highway 31; Clay Waste West between Spring Mill Road and Towne Road; and, the Michigan Road Corridor, which lies generally west of Towne Road and extends into Boone County. In 1991 the District's Michigan Road Wastewater Treatment Plant was constructed west of Michigan Road south of 106th Street in Boone County and was expanded in 1996 to 1.05 million gallons per day and to 2.55 MGD in 2004. Generally, flow west of Towne Road flow to the District's treatment plant. In 2006, the Meridian Corridor Lift Station was upgraded to enable it to pump to both the Carmel and the District's plants.

Clay Township
Regional Waste District
10701 College Avenue Suite A
Indianapolis, Indiana 46280
phone 317-844-9200 fax 317-844-9203
